

Truck

Air Conditioning

Great cooling performance. No idling required.

The E-2200Pro is a DC-powered air conditioning system that operates when the vehicle's engine is turned off, allowing drivers to rest in comfort wherever they are, day or night.

The lightweight and low profile design makes the unit suitable for most applications without compromising fuel economy or chassis space.

The E-2200Pro keeps commercial vehicle cabs at a safe and comfortable temperature. It's quick and easy to install, quiet in operation, and has a slim design.

Features&Benefits

- 12V & 24V DC
- Cooling Capacity 2200W/7600BTU max A/C
- DC Inverter Scroll Compressor
- Light weight only 19.8kg
- Digital panel
- Multi-function remote control
- Low battery cut-off
- Low maintenance
- Very low noise
- Low profile - slim-line design
- 1 year warranty

SEPCIFICATIONS

Model	E-2200Pro
Installation Type	Rooftop AC, slim, integrated
Voltage	DC12V,DC24V,DC48V or DC72V
Cooling capacity	2200W/7600BTU
Rated Power	960W
Current consumption	40-80A
Evaporator blower air vol.	450m3/h
Working Mode	Fan mode/Eco mode/Powerful Mode
Noise	< 65dBa
Refrigerant/Volume	R-134a/500g
Weight	19.8kg
Dimensions	680*675*149mm
Air outlet plate height	26mm
Vehicle Applications	All trucks, van , tractor and RV cabs etc.
